

Datago Technology Limited

Datago Technology Limited is a fintech company founded in 2016, specializing in financial text analytics. Utilizing advanced AI technologies, including large language models (LLMs), we analyze large-scale text data from comprehensive sources like news, corporate disclosures, analyst research reports, and social media discussions, providing quantitative and easy-to-use structured data analysis services.

Our clients include top hedge funds and brokerages across Mainland China, HK, US, and UK, as well as prestigious universities worldwide, including Peking University, Tsinghua University, the University of Hong Kong, and the University of Toronto. We have developed over 40 data products spanning Asian and emerging global markets, including China, India, Japan, and South Korea. Key offerings include:

1. **Retail Investors Sentiment Data.** Tracks and analyzes retail investor attention towards listed companies through online searches, virtual trading activities, stock forum discussions, and provides quantitative sentiment scores.
2. **News Sentiment Data.** Evaluates the sentiment and attention of hundreds of media outlets, online news platforms, and key social media influencers toward listed companies.
3. **Corporate Disclosure Reports and Investor Relations Data.** Analyzes annual reports, corporate announcements, and investor relations activities, including interactive Q&A, online roadshows, and company-disclosed IR activities.
4. **ESG Data.** Provides ESG ratings and detailed indicators, ESG risk event analysis, carbon emissions data, ESG fund data, and news ESG sentiment of listed companies.
5. **Corporate Relationship Graphs.** Covers supply chain relationship graphs, executive social network graphs, and ownership analytics of invention patents (through equity penetration)
6. **Consensus Forecasts and Text Analysis for Analyst Research Reports.** In addition to standard earnings forecasts and rating data, offers textual analytics of research reports such as sentiment and topic analysis.

We also offer customized datasets designed to track academic research trends, which include indices for corporate economic policy uncertainty and digital transformation. To meet the evolving demands of the market, we have recently released **TextGo • Search Engine for Financial Text Analytics (www.datagotext.com)**. With the belief in "Text as Data", TextGo empowers users to perform targeted searches and extract analytical insights from various textual sources like news, social media, corporate disclosures, annual reports, analyst research reports, interactive Q&A and online roadshows. Additionally, TextGo incorporates popular text analysis tools such as sentiment analysis, readability analysis, and word vector searches, delivering tailored data analysis services for researchers focusing on specific subjects.
